👤 Software Engineer

Profile

Dedicated and self-motivated Computer Science graduate with three years of experience in frontend development, primarily specializing in TypeScript, Angular, and Ionic. My portfolio includes projects across various domains, like messaging applications, business portals, and mobile wallets. Equipped with a strong knack for problem-solving and a demonstrated ability to pick up new technologies swiftly, I am keen to leverage my skills to deliver innovative software solutions. Though my expertise lies in frontend technologies, I'm eager to expand my knowledge into backend development to contribute to end-to-end software development processes.

Work Experience

10/2021 – PRESENT PRETORIA, SOUTH AFRICA

Software developer Monkey and River

Key Projects:

1. Goald Business Portal (October 2020 - January 2021): Spearheaded the front-end development of a user-friendly business portal using TypeScript and Angular, where companies could set, manage, and track goals.
2. Moya App iOS (August 2021 - January 2022 - Ongoing): Acted as the lead front-end developer to create a large-scale mobile messaging app using TypeScript, Angular, Ionic, and SQL.
3. Moya Statuses (July 2021 - September 2021 - Ongoing): Led the front-end development for Moya Statuses, a mobile app facilitating status updates.

Work Experience

4. MoyaPay (February 2021 - July 2021 - Ongoing): Led the front-end development for MoyaPay, a mobile wallet app with extensive user-friendly features.
5. Photo Object Detector: Authored an image processing app for a signup system that detects faces and ID cards/passports using OpenCV JS.
